

TROY PRODUCTS NEW 2015 CHEVY TAHOE PARTITION

- . Optimum leg room & seat recline
- . Air-bag tested partition design
- . Easy entry into back seat
- . Extra knee/foot room
- . Unique no-holes-drilled design

TROY PRODUCTS has an entire line of front partitions, plastic seats with officer-safe belt system, and cargo partitions to completely outfit your new 2015 Tahoe.

New to the TROY line is the space maker partition (pictured). The combination of a bent frame partition and TROY's big-boy mount provides maximum room in the front seat and the back! The standard "straight-frame" partition is still available.

The TROY partition mount design will save you installation costs. You **don't remove** the B-pillar cover; you **don't cut** the B-pillar cover; and you **don't drill** into the B pillar.

TROY has been providing the industry with air-bag tested mounts since 2008! Our unique design allows for (1) full deployment of airbags and (2) officer protection. A detainee cannot get a hand through the rigid panel (.25" thick) to reach the officers.

The lower kick panels feature optional "foot pockets" to further increase back-seat space, if preferred.

TROY has several partition options to choose from:

- Aluminum framed window inserts
- Punched window patterns (lower costs)
- Straight-frame partition models
- Bent-frame (space maker) partition models
