

# TROY Crown Victoria & New Police Interceptor Consoles

*All Crown Vic low-profile consoles transfer to (or can be ordered for) the new Ford Police Interceptor Sedan. The console heights are in line with the seats. Can also work in UV if a low profile installation is preferred.*

**CC-BPD-15** – 9" sloped area and 6" of level area between the seats. This low-profile console is ideal for a U-mount computer solution (as pictured).

**CC-LASD-15** – 7" of sloped area and 8" of level area. The U-mount on the flat deck of this console shows a Ledco docking station on a swing arm. Computer part number is CM-UMNT-SA-LED.

Console sides are punched with speaker holes so speakers can be mounted internally. More officer leg room!

The arm pad can be reversed so it doesn't hover over the console. The part number is AC-ARMMNT-NS.

**CC-FDMC-16** -- 7" of sloped area and 9" of level area between the seats. The console features a flat deck for working with computer mounts.

Bolted to the console side is a ticket book pocket. It is sold separately. The part number is AC-POCKET.

*These consoles also are ideal choices when mounting computers. The entire set up can be configured as a low-profile solution to minimize blind spots in the vehicle and to optimize officer comfort and safety!*
