

TROY PRODUCTS

TAHOE –SPECIFIC WIDE-BODY CONSOLES

Fills entire space between seats and helps keep your vehicle looking neat!

TROY's Tahoe wide-body consoles are 12.36" wide (OD). This width includes our standard face plate mounting area (on driver side) plus an open storage area (on passenger side). The open area is 3.38" wide (ID).

Front side panels under dashboard create a clean, closed environment to hide wires, speakers, etc.

The front sloped area butts cleanly against dashboard. The OEM traction control switch easily re-locates to console. TROY provides two (2) power ports to replace OEM ports. The slope holds 7" of face plates. The level area is for face plates as well as items such as internal beverage holders, sunglass tray, storage compartments, etc.

Choose from (4) lengths:

CC-TMCWB-16
CC-TMCWB-25

CC-TMCWB-20
CC-TMCWB-30

Ideal console choice for those who routinely use map books, 3-ring binders, file folders, clipboards, etc.

TROY also offers a flat (non-sloping) wide-body Tahoe console. Choose the look that's right for you.

Compatible computer mounts for a Tahoe are:

- Console insert type (bolts into sloped FP area)
- Side mount (bolts to side of console – shown)
- Passenger seat mount (bolts to seat bolts)

Call to discuss the best solution for Tahoe. All Tahoe consoles also work in Suburbans.

CC-TMCWB-25 IN 2011 TAHOE
