

SEARCH & DESTROY.

OVERVIEW - Panasonic's Data Protection offers the ultimate data protection, computer theft recovery and asset tracking solution. Panasonic is a preferred provider of Computrace® by Absolute Software. Using any type of internet connection, Computrace works behind the scenes on your Toughbook® laptops to silently and securely contact the Absolute Monitoring Center every 24 hours to report its location. If a Toughbook computer is reported missing or stolen, the machine is flagged to call in every 15 minutes and then the Absolute Recovery Team goes to work.

SERVICE BENEFITS

- Embedded in the BIOS firmware.
- Optional remote data delete capability.
- Track and recover stolen or missing computers with law enforcement.
- Generate asset reports for upgrades, roll-outs and computer retirement.
- View daily reports on unauthorized software use and hardware changes.

Product Features

Data Protection

Computrace offers the ability to remotely delete data* on stolen computers to keep sensitive information from falling into the wrong hands. This feature helps meet strict regulatory compliance requirements and ensure computers are left clean and free of sensitive data at retirement.

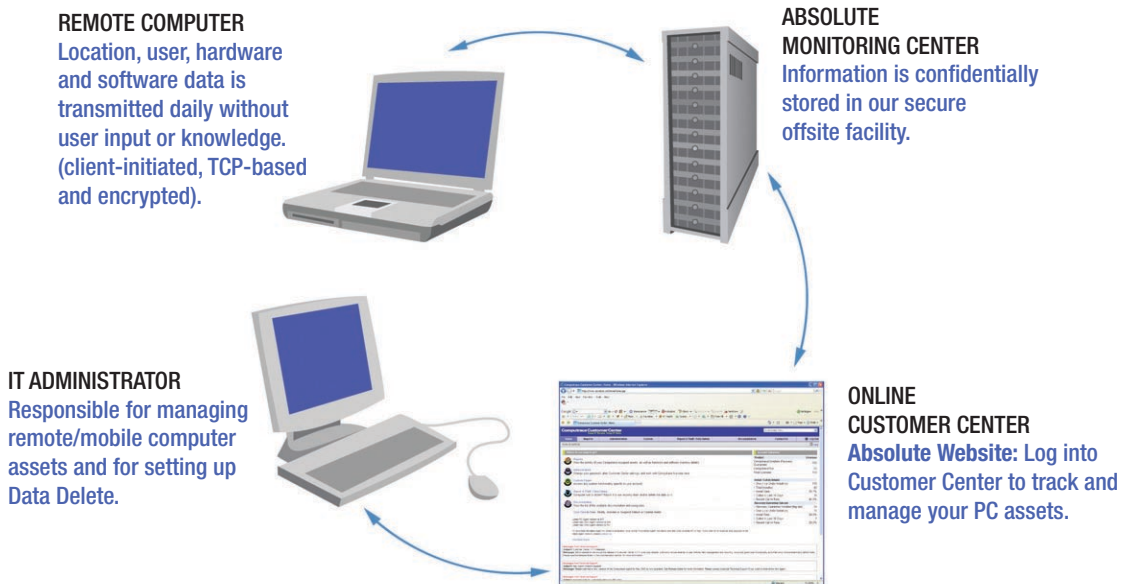

Computer Theft Recovery

Computrace deters theft, minimizes computer drift and aids in recovering lost or stolen computers when they go missing. When a Toughbook PC is reported stolen, Absolute's Recovery Team immediately goes to work with local law enforcement to track and recover it. The Team provides law enforcement with tracking information to pinpoint the physical location of the computer and documentation needed to obtain subpoenas and procure search warrants. Depending on the product selected, a Recovery Guarantee** of up to \$1,000 may apply if a computer cannot be recovered within 60 days of theft.

Secure Asset Tracking™

For IT asset management, Computrace gives 100% visibility into computer assets, providing data for planning assumptions and credibility for future technology requisitions. Additionally, assets can be managed through a selection of unique reports and user-defined fields. These inventory management reports provide a view into your entire computer population, including remote and mobile users, allowing IT staff to accurately track computers, who is using them and what is installed on them.

Absolute® Software Computrace®

Levels of Protection

Regardless of the number of computers you want to protect, we have the computer security product that is just right for you. Don't wait until one of your computers goes missing and confidential information falls into the wrong hands - take the necessary steps to ensure your Toughbook computer and its sensitive data are protected with one of these Computrace solutions. These data protection services are available on all new deployments and, if your organization requires, may also be purchased for an existing deployment. Please consult your Panasonic representative for details.
