Technical Bulletin # 2006-01

## Rotators

The worm and worm gear used on all Code 3 lightbars, beacons and rotating systems have been redesigned in conjunction with one of the leading gear manufacturers in the United States.

By using state of the art technology in gear design, this new system dramatically reduces the noise level of the rotators.

Code 3 incorporated these new rotators into production Monday, April 3, 2006.

Due to the fact that both components have been redesigned, they are not compatible with previous gears. Replacement gears must be ordered and installed as a set.

If you have any questions, please contact Code 3 Technical Service at 314-996-2800.
