

SETINA

SIDE CURTAIN AIRBAG COMPATIBLE PARTITIONS

Setina Manufacturing Company, Inc. is proud to announce that we have developed our New! Series of Law Enforcement Vehicle Partitions, designed for the 2006 Chevrolet Impala and Dodge Charger equipped with Side Curtain Airbags.

Through actual airbag deployments, our New "Patent Pending" Side Curtain Airbag Partitions, have been successfully tested by the manufacturer of Side Curtain Airbags, at their test facility in Detroit, Michigan. The testing confirmed that our Side Curtain Airbag Compatible Partitions, "Do Not" interfere with the deployment of the Side Curtain Airbags.

Our Side Curtain Airbag Compatible Partitions utilize lighter gauge polycarbonate upper filler panels, which have the same general appearance as the standard rigid panels used in the non-airbag vehicles. These Side Curtain Compatible upper filler panels have been designed to separate from the partition in the event of an airbag deployment.

With our new, Side Curtain Compatible Partitions, we would also like to give you some safety information:

It is important that all officers be informed, that every prisoner "Must" be handcuffed and seat belted while being transported. The upper transparent filler panels are designed to be a barrier from the rear seat area to the officer's compartment, but may be detached by a suspect if not handcuffed.

It is also very important that you "Never Install or Transfer" any Vehicle Partition into a Side Curtain Airbag equipped vehicle, using rigid upper filler panels designed for non- airbag vehicles.

Additionally, "Do Not" attach any overhead equipment to the Partition, such as Gun Locks, etc. that will protrude into the Side Curtain Airbag Deployment Zone.

For more information, on up-coming vehicle availability please contact Setina Manufacturing Company.
