PANASONIC TOUGHBOOK ARBITRATOR MOBILE DIGITAL VIDEO SYSTEM

Toughbook Arbitrator is the next-generation Mobile Digital Video System combining state-of-the-art digital recording and data-compression technologies to achieve the world's most advanced, reliable and easiest-to-query incident documentation system. Like all ruggedized Panasonic Toughbook products, the Toughbook Arbitrator is built to take whatever the hazards of the job dish out. In addition to a shock-resistant, anti-wear-coated, cast-magnesium case, the camera features a custom, multi-function mount that also serves as a heat sink to extend camera service life and improve operating stability.

- Industry's first fully integrated all digital solid-state video system.
- MIL-STD-810F tested for ruggedness.
- MPEG4 compression for easy storage and fast wireless transmission of full-motion video files.
- Digital cameras and microphones controllable locally or via in-car laptop.
- Ruggedized 220X zoom camera with built-in infrared and 0.07 lux low-light capability.
- Up to 32-hour recording on twin, high-speed 16GB P2 memory cards.
- Proprietary tamper-resistant technology for maximum evidence integrity.
- 3 configurable archive types (P2, local HDD, external HDD).
- 2 configurable file transfer types (Wireless, Ethernet).
- Programmable automatic eight-way system-on trigger interface.
- Captured Video and Audio Data is searchable by Time, Date, Office, Vehicle, Incident, Trigger, Event, Bookmarks (officer notes) and Extensive Captured Meta Data.
- Open-system software ensures maximum compatibility and stability.
- 90-second adjustable video buffer for both pre- and post-recording.
- The system works in either a standalone capacity or interface with Toughbook notebook PCs.

The Only Pure-Digital Solution

This is the only pure-digital solution for law enforcement, anti-terrorism, public service, military and private sector agencies needing real-time recording of events and incidents for possible use in legal proceedings, evaluations and training. Reliable solid-state digital technology has vastly improved the way video evidence is captured and processed. It eliminates the need for video tapes and enables evidence of events to be reliably captured, stored and digitally transferred. Additionally, solid-state digital video systems perform exceptionally well in harsh environments including those with high vibration or extreme hot and cold temperatures. The Toughbook Arbitrator's solid-state digital recording system renders obsolete competing systems dependant on unreliable and easily manipulated mechanical recording media such as video tape and computer hard drives.

The Ideal Witness

The Toughbook® Arbitrator digital video recording system incorporates a high-performance camera with a wide angle lens and a wireless microphone to accurately record events as they occur. Footage is captured on rugged, solid state Panasonic P2 cards with the option to wirelessly transfer data to the station using a Panasonic Toughbook mobile computer or any other vehicle-mounted PC. The Arbitrator's custom software generates an audit report of anyone who views or copies the video. This feature, combined with a wide angle camera lens, zoom range and infrared capabilities make it the ideal witness when video evidence is presented in court or other critical situations that require accurate video documentation.

TuffHub *The ultimate in ruggedized communications*

When rugged counts! Introducing the industry's first MIL-STD-810F vibration tested rugged USB/ethernet hub. Expanding connectivity requirements is now easily attained with this 3 port, fully powered USB 2.0 hub featuring a RJ45 port. Adding peripherals such as in-vehicle video, GPS, scanners, card readers and printers is no problem for the TuffHub. This ground breaking product provides a rugged solution for computer users operating in unfavorable conditions. When device uptime counts, the TuffHub leads the industry, maximizing data productivity with the highest quality solution on the market.

- Best-in-class, 5-year warranty
- Great option for adding in-vehicle video
- Exceeds MIL-STD-810F, an industry first, proving the unit will survive harsh shock & vibration environments
- Prevents accidental disconnects with tug resistant strain relief for all connections
- Ensures hub will not interfere with sensitive radios by providing superior EMI/RF filtering

- Protects peripherals from damage during over-voltage, engine cranking and voltage spikes
- USB 2.0 Certified, ensures compatibility with in-vehicle video, GPS, scanners, card readers and printers

TUFFHUB PORT REPLICATION

- **USB:** 480 Mbps USB 2.0 (3)
- **Ethernet:** 10/100 Mbps RJ45 Ethernet (1)
- **In-line Noise Filtering:** yes
- **EMI Filtering:** yes

OTHER DOCKING STATIONS AVAILABLE
www.territorialsupplies.com

Havis Ledco CFX2 TuffDock

Have you ever had a problem with your mission critical mobile computing that required you or members of your team to return to the station for diagnostics and repair? Lost time, lost productivity, higher cost of ownership? We've got the solution – Havis' new CFX2, the industry's first intelligent dock. Now your toughest, most demanding mobile computing applications become even more productive with CFX2's use of real time intelligent diagnostics and its expanded USB 2.0 ports. Need to plug in a temporary USB device or need to know whether all 6 USB ports are available? No problem with the front-facing USB port and LED status lights provided by the CFX2. Power and connectivity questions? No problem with CFX2's easy to read real time diagnostics LED. Concerned over durability? The CFX2 is "Beyond Toughbook Tested" to meet the stringent Havis requirements.

- Compatible with any Panasonic CF30, CF29 and CF28 Toughbook!
- Smallest footprint and lightest weight of any comparable product, taking up less cabin space than any other dock currently available.
- Improves productivity by reducing downtime with onboard diagnostics via an easy to read LED light system that allows for remote troubleshooting.
- Tested to the highest standards in the industry, above and beyond Toughbook™ standards.

No matter what your mobile computing application, the CFX2 has been tested to the industry's toughest standards. Lightweight and durable, the CFX2 provides intelligent feedback to the user, saving time with field troubleshooting and improving productivity and overall uptime of the mobile computing system. And the CFX2 provides the industry's safest and most secure solution, keeping your expensive laptop where it belongs, docked and productive.

For mission critical applications, the CFX2 is the docking station of choice. When used with Havis' mounting solutions, the CFX2 becomes the industry standard for ergonomic solutions, quality and safety. Don't trust your Panasonic CF-30 Toughbook solution to anything less than the Havis CFX2.

ANTENNA PLUS

They're Not Just the New Kids on the Block

Antenna Plus has been developing innovative antenna solutions since 1991. They have carved out the top quality spot for mobile solutions in the government, public safety, field service, AVL and road warrior markets. They have also developed superior performing antennas for telemetry and the new communicating kiosk/vending market. Today, Antenna Plus produces antennas for cellular, PCS, GPS, WiFi and most private radio frequencies, and can combine many of these together into one unit to make for a simple and easy-to-install solution.

Overcoming the Challenge of Shielding

People who must use their laptop and wireless data modem in the car experience a reduction in performance. The metal and glass from the vehicle shields the modem from getting back to the cell site. This can impair the signal strength by as much as 20% or 10 dBi. By using Antenna Plus'

antennas, you get the signal out of the vehicle, elevate it on the roof and then apply a 3 dB gain with the patented design to give you the greatest reach to the communication network. This increases the geographical area where you can still work and also results in faster data throughput speeds as your quality of connection to the wireless network is better.

Making the Best Antennas

Antenna Plus has worked very hard to be the top quality antenna manufacturer. They were the first company to design and patent low profile antennas that are now seen on many police and field service vehicles. The benefit of this form factor is a very long product life. Their antennas survive car washes, being swept by tree branches and all environmental conditions. Each of Antenna Plus' communicating frequency antennas has an omnidirectional 3 dBi gain – they believe this is the best for mobile solutions. Antenna Plus builds all of their products at the factory in the USA under the close scrutiny of their cofounder. This attention to detail ensures that each antenna that ships meets their stringent quality standards.

Antenna Plus Products AP-Navigator Family

This product line includes a 12-Channel Trimble GPS Receiver as well as your choice of a variety of communication antennas. You can add a cellular antenna, 700 MHz antenna and even a WiFi antenna.

- All-in-One GPS/AVL Hardware Solution for mapping solutions plus all of your communication antennas
- Only one hole to drill – simple installation
- Best reach to your cellular and WiFi networks with the 3 dB gain external antennas
- Solves the problem of how to do all three wireless technologies with rugged laptops and docking stations

Your GPS hardware and all of your communication antennas are in one low profile housing. This is very simple to install and, best of all, you will be surprised at the great price!

The Navigator can connect to wireless PC cards and/or docking stations when the wireless pass-throughs have been enabled. It can be mounted using permanent adhesive or magnetic mount.

Combination Antennas for Cellular, GPS & WiFi

With this family of products, you can connect to any cellular data modem, GPS receiver or WiFi modem. This includes wireless PC cards, trunk mount modems and Rugged Laptops with embedded wireless and a docking station. You can have just cellular or you can combine any of the needed technologies into one low profile housing. Mounting choices for most of these antennas include: permanent adhesive, magnetic, threaded bolt or NMO.

WiFi Modem & Antenna

For people who demand the best performing WiFi in the vehicle, this product builds in an 802.11 b/g modem and high gain antenna that is placed inside the antenna housing. This results in the farthest reaching WiFi with the fastest data throughput speeds. This unit mounts using Antenna Plus' permanent adhesive or magnetic mount.

Private Radio Antennas

Antenna Plus makes top performing antennas for UHF and SMR network technologies as well as cellular for EMEA and Asia Pac areas. These include antennas and GPS combination antennas for 300, 400, 700, 800, 900 and 1800 MHz networks. Mounting choices for most of these antennas include: permanent adhesive, magnetic, threaded bolt or NMO.

The Toughbook Arbitrator mobile digital video recording system includes:

- Camera, Wide Angle Lens, Camera Mount, P2 Recorder, Cable and Control Panel
- Genuine Windows® XP Professional
- High-performance digital P2 video and audio recorder
- Wireless microphone system
- Features a new 3.5" TFT LCD control panel
- Low-light imaging down to .07 lux (color) and .04 lux (B&W)
- Infrared technology allows for viewing even in complete darkness
- Nearly 70-degree wide-angle lens for larger field of view that delivers a 27.2' viewing area
- Powerful 22x optical and 220x digital zoom
- Archival of recorded files on a local/external hard drive or DVD-R/CD-R
- File transmission via 802.11g or other high-speed wireless networks
- Open-system software for maximum compatibility and stability
- Temperature-, vibration- and dust-resistant
- High-performance P2 solid state storage
- Solid-state digital recording (the most reliable means of capturing video data)

32 Hours of Video

The Toughbook Arbitrator is a significant improvement over every other system available to automatically record, log, file and disseminate audio-video files from critical action sites. By eliminating videotape and hard-drive recording hardware and adopting MPEG4 video-compression technology, Panasonic is able to give its Mobile Digital Video System up to 32 hours of full-motion video in individual files small enough to be securely transmitted to a back-end server over wireless networks with Toughbook-worthy reliability.

Camera:

Zoom Range	22x Optical: 220x (with Digital)
Low Light Capability	0.7lux (color); 0.04lux (B/W)
Infrared	Auto/Manual
Wide Angle Lens	3.5 - 68.4 degrees
Auto Adjustments	Focus, White Balance
Camera Weight	18.3 oz.
Camera Dimensions	6.5" (L) x 2.8" (W) x 3.2" (H) (with Sun Visor)
Zoom	Auto/Manual
Back Light Compensation	Auto/Manual
Record	Auto/Manual
Control Illumination	Auto/Manual

P2 Recording Deck:

Recording Media	Solid State P2 Card
Number of Card Slots	2
P2 Card Capacity	16 GB
Recording Time	16 Hours Per Card (512Kbps); 8 Hours Per Card (1Mbps)
Resolution	320 x 240 (QVGA) or 720 x 480 (D1)
Pre- / Post-event Recording	0 - 180 seconds adjustable
P2 Recording Deck Weight	37 oz
P2 Recording Deck Dimensions	7.0" (W) x 2.0" (H) x 6.1" (D)
Key Lock	Tamper-resistant for Evidentiary Integrity
On P2 Deck	Record, Stop
Via Laptop PC	Record, Stop, Play, Pause, Slow
External Triggers	Up to 8 Configurable (Including, Radar, Air Bag, Shotgun Rack)

Audio System:

Wireless Receiver:	
Frequency Range	Digital Spread Spectrum (902-927MHz)
Channels	20
Antennas	In-car Diversity, Internal Windshield Mount
AC Charging Bay	For 1 Digital Wireless Mic
Wireless Receiver Weight	28.2 oz.
Wireless Receiver Dimensions	3.2" (L) x 4.1" (W) x 1.5" (H)
Wearable Wireless Microphone & Receiver:	
Power Supply	12 Hour Rechargeable Battery
Input	Lavalier and Internal Condenser
Auto Sync to Receiver	Up to 1,000 Ft. Range
Receiver Dimensions	1.2" (L) x 2.5" (W) x 3.97" (H)
Audio Inputs:	
Hidden In-car Microphone	Pin Jack x 1
Channels Available	3 (2 simultaneous)

PANASONIC TOUGHBOOKS

Why Panasonic Toughbooks?

Panasonic Toughbooks are built to last. It's that simple. Where other laptops claim to be rugged, Panasonic Toughbooks are rugged. When you purchase a Toughbook you are purchasing a laptop that can take the abuse of your job and keep on going. Panasonic also offers a variety of options and upgrades for your Toughbook that are second to none.

Toughbook Tough

Toughbooks are made to not only withstand the rigors of your job, but to work in them: the road vibration and coffee spills in a car; the dirt, rain and wind outside a car; drops that occur everywhere and a wide range of temperature extremes. The fully Rugged Toughbooks are tested to MIL-STD-810F standards. Those of us here at Territorial Supplies know how tough these computers really are. Johanna and Neal have seen Panasonic's extreme live demonstrations where Toughbooks are pitted against other brands to see who really can take the abuse – every time the Toughbooks have outlasted the competition. The rest of us have tested the Toughbooks' claims both in the office and at home – every time the Toughbooks have survived our abuse where others would have failed.

Return on Investment

Toughbooks provide you with the best Return On Investment (ROI). The industry standard is 50% down time due to repairs. With a Panasonic Toughbook the average is 20% downtime. Additionally, Panasonic Toughbooks often outlast their warranty periods, but may still retain value. With PlanITROI's services you can have your old Toughbooks purchased from you for resale, PlanITROI can help you donate your old units for a tax benefit or sell them to your employees or PlanITROI will recycle old units without any value (free of charge) to EPA EPEAT standards. All services include the removal of data from the hard drive according to Department of Defense (DOD) guidelines and a Chain-of-Custody Report. Additionally, Environmental Protection Agency EPEAT standards are strictly followed to ensure minimal environmental impact.

Options, Options, Options

In addition to the numerous configuration options that are available for the Toughbooks, there are service options. Whether you are looking for an extended warranty, easy asset management, theft tracking, quick technical service or another like service we have you covered! Check out our website at www.territorialsupplies.com for more information about the following options.

Asset Management – Panasonic's Asset Management gives your organization's administrators a flexible, convenient way to track and report on your Toughbook® computer assets as well as other deployment-related assets.

CompuTrace Data Protection – Panasonic's Data Protection offers the ultimate data protection, computer theft recovery and asset tracking solution.

Disk Image Management – Panasonic's Disk Image Management ensures that all software on your Toughbook® laptops remains consistent and up to date throughout the entire deployment.

Hot Swap – Panasonic's Hot Swap Management provides your users with next-business-day delivery of a customer-owned Toughbook® laptop when their Toughbook PC requires service.

Online Service Analysis – Panasonic's Online Service Analysis gives your organization the power to proactively monitor your Toughbook® PC service data on a password-protected website.

Onsite Service – Panasonic's On-site Service reduces downtime and increases productivity by performing in-warranty service on Toughbook® laptops at your users' work locations.

Extended Battery Warranty – Panasonic's Extended Battery Warranty can streamline your organization's out-of-warranty battery replacement process for up to five years.

Extended Warranty – Panasonic's Extended Warranty provides your Toughbook® computers with up to an additional two years of Panasonic's excellent Standard Warranty coverage.

Protection Plus – Panasonic's Protection Plus enhances the Toughbook® computer 3-Year Standard Warranty by offering an additional layer of protection against unintentional physical damage.

ACCESSORIES

NetMotion Wireless Mobility XE The Industry's Leading Mobile VPN

MOBILE VPN

– the Fulcrum of a Successful Mobile Deployment

The benefits of mobility are compelling – increased worker productivity, lower operational costs and improved customer service and support. A successful mobile deployment empowers mobile workers with the resources they need to be effective – resulting in faster business transactions, improved customer service and ultimately happier customers and increased revenue.

At the fulcrum of a successful mobile deployment is a Mobile Virtual Private Network (Mobile VPN) – providing mobile, wireless workers with secure, reliable, remote access to network resources and information from virtually anywhere. Only a Mobile VPN is designed to deal with the unique challenges associated with mobile computing such as wireless security, performance and roaming.

Improve Security, Productivity and Management

The best-in-class Mobile VPN is Mobility XE – NetMotion Wireless' flagship solution built from the ground up for mobile and wireless environments. Unlike legacy SSL and IPSec VPNs that do not perform well in wireless environments, Mobility XE is a Mobile VPN designed to deal with wireless security, coverage gaps, roaming, performance and handheld device support.

Easy to Deploy, Software-only Solution

Mobility XE is an easy-to-deploy client/server software solution that helps minimize costs and complexity. Remarkably easy to install, Mobility XE deploys in hours, not days, without custom software deployment or expensive application rewrites. Its use is transparent to end users – no configuration or training required. Mobility XE server software can be installed on a server behind the firewall or in the DMZ, and lightweight client software is installed on each device – any combination of laptops, tablets, pocket PCs and smartphones.

Proven in the World's Most Challenging Mobile Environments

Mobility XE is used in some of the most mission-critical, highly regulated and technically challenging environments in a wide range of industries including telecom, utilities, healthcare, transportation, government, manufacturing and public safety. Over 1200 customers have maximized the productivity, security and management of their worldwide mobile workforces with Mobility XE.

Panasonic W8 Toughbook Laptop

Presenting the next-generation mobile computing solution for the business traveler. The new business-rugged Toughbook® W8 is built to handle up to a 30" drop, as well as the bangs and bumps of a hectic day. And it's well equipped with Wi-Fi and optional embedded Gobi™ 3G global mobile Internet (WWAN) that connects just about anywhere your cell phone can. Add to that increased security and remote management with Intel® Centrino® 2 with vPro™ technology, easy to use circular scrolling, and a spill-resistant keyboard and touchpad, and you get a laptop that lets you do more than you ever expected. And not just at your desk.

- Touchscreen 12.1" LCD
- Intel® Centrino® 2 with vPro™ Technology
- Magnesium Alloy Case
- Drop- and Spill-resistant
- Circular Scrolling
- 3G Mobile Broadband-ready Design
- 3.0 lbs. with 7-hour Battery Life
- Genuine Windows Vista™ Business (with XP downgrade option)
- Intel® Wireless WiFi Link 5100 802.11a/b/g/draft-n
- Shock-mounted removable hard drive

Panasonic

TOUGHBOOK®

RUGGED ULTRA MOBILE HANDHELD PC

Panasonic Rugged Ultra Mobile Handheld PC U1

The NEW Panasonic Toughbook U1! The Panasonic Toughbook® U1 is a new kind of mobile computer, a one-two punch of Toughbook ruggedness with hot-swappable twin batteries for full-shift productivity. We wouldn't want to put words in your mouth, but being able to run Windows® XP or Vista® while still maintaining its convenient lightweight design is something other handhelds can't begin to imagine. Couple that with its seemingly endless integrated options like GPS, 3G mobile broadband, a 2MP camera and fingerprint and barcode scanners, and you might forget you're not carrying a laptop. We won't say Panasonic reinvented the handheld. We'd rather wait and hear you say it.

- Genuine Windows Vista® Business (w/ XP downgrade option)
- Intel® Atom™ Processor Z520 1.33GHz, 533MHz FSB, 512KB L2 Cache
- Integrated options: barcode and fingerprint readers, camera, GPS, and 3G mobile broadband
- Up to 9 hours of battery life
- Hot-swappable twin Li-Ion batteries
- Solid State Drive
- MIL-STD-810F- and IP54-compliant — four-foot drop, rain-, spill- and dust-resistant
- 5.6" LED touchscreen — sunlight viewable with 1024 x 600 WSVGA
- Backlit QWERTY keyboard with zoom and scroll buttons
- 4 user programmable buttons
- Certified for AT&T, Sprint and Verizon Wireless networks

RUGGED LAPTOPS

Your business is tough. That's why Panasonic built a laptop that can handle just about anything you throw at it. These Toughbook® computers are manufactured to endure 3-foot drops and to withstand violent shocks and vibrations. They are fabricated to operate at temperatures over 140° and below -20° Fahrenheit and function both at high altitude and under increased atmospheric pressure. See the incredible MIL-STD-810F- and IP54-compliant tests these machines pass in order to be Toughbook rugged.

Panasonic CF-19 Rugged Toughbook Notebook

If you want a fully-rugged, lightweight, wireless laptop that converts from a powerful notebook PC to a convenient tablet PC with one quick swivel, then the Toughbook® 19 is for you. It features a full magnesium alloy case with a hand strap—ideal for working in those challenging environments and mission-critical situations. At only five pounds, it's good on the go with embedded Gobi™ 3G global mobile Internet (WWAN) and GPS capabilities, Wi-Fi and a sunlight-viewable display.

- Convertible Notebook to Tablet Design
- 1000 Nit Sunlight-viewable Display
- Full Magnesium Alloy Case with Hand Strap
- Shock-mounted, quick-release Hard Drive
- Sealed port and connector covers
- Intel® Centrino® 2 with vPro™ Technology
- 3G Mobile Broadband- and GPS-ready Design
- Genuine Windows Vista® Business (with XP downgrade option)
- Integrated Intel Wireless WiFi Link 5100 802.11a/b/g/draft-n
- 10.4" daylight-readable color LCD swivels for optimum visibility
- Pressure-sensitive touchscreen can be used with a stylus or the touch of a finger (also available with pen-only digitizer screen)
- 5.1 lbs., lightweight design
- Rain-, spill-, dust- and vibration-resistant
- HDD heater
- Optional integrated Gobi 3G global mobile internet (WWAN)

Panasonic CF-30 Rugged Toughbook Laptop

The MIL-STD-810F- and IP54-compliant Toughbook® 30 is the industry's fastest fully-rugged mobile PC. Its 13.3" 1000 nit sunlight-viewable optional touchscreen and optional backlit keyboard are moisture- and dust-resistant and ensure easy viewing in any lighting condition. It can withstand a 3-foot drop, has a full magnesium alloy case with handle and shock-mounted quick-release hard drive to deliver maximum durability, portability and uptime no matter where your work takes you.

- 1000 Nit Sunlight-viewable Display
- Full Magnesium Alloy Case with Handle
- Shock-mounted, Quick-release Hard Drive
- Intel® Centrino® 2 with vPro™ Technology
- 3G Mobile Broadband- and GPS-ready Design
- Genuine Windows Vista® Business (with XP downgrade option)
- Integrated Intel Wireless WiFi Link 5100 802.11a/b/g/draft-n
- 13.3" daylight-readable TFT Active Matrix Color LCD with optional touchscreen
- 8.4 lbs., including battery and handle
- Moisture- and dust-resistant LCD, keyboard and touchpad
- Sealed port and connector covers
- Shock-mounted removable hard drive in stainless steel case
- HDD heater
- Optional integrated Gobi 3G global mobile internet (WWAN)

SEMI-RUGGED

Succeeding in business today requires flexibility; you need a laptop that delivers high performance both in the office and out in the field. Semi-rugged Toughbook® computers are tough, but sleek; lightweight, but powerful; built for bounces and built for speed. This line combines the best features of Panasonic's toughest laptops with the style and execution of Panasonic's smartest machines.

Panasonic Semi-Rugged CF-52 Toughbook Notebook

The only full-power desktop replacement laptop PC with Toughbook® durability, reliability and performance. With either a 15.4" widescreen or a 13.3" sunlight-viewable 1000 nit touchscreen, it's the ultimate business tool for group presentations and advanced technology to run multiple applications without a hitch. Add to that increased security and remote management with Intel® Centrino® 2 with vPro™ technology. And optional embedded Gobi™ 3g global mobile Internet (WWAN) lets you work seamlessly pretty much anywhere.

- 15.4" Widescreen or 13.3" Touchscreen LCD
- Intel® Centrino® 2 with vPro™ Technology
- Magnesium Alloy Case with Handle
- Shock-mounted, Quick-release Hard Drive
- Drop- and Spill-resistant
- Mobile Broadband-ready Design
- Genuine Windows® XP Professional or Windows Vista™ Business
- Optional SmartCard reader
- DVD Super MULTI Drive with dual layer support
- Optional integrated Gobi 3G global mobile internet (WWAN)

BUSINESS RUGGED

Panasonic's thinnest, lightest-weight Toughbook® computers are a smart choice for busy professionals. These sleek, slimline laptops have a resilient magnesium alloy case, mobile broadband-ready capabilities and up to 9 hours of battery life. Equally at home on a plane or in a boardroom, they're designed for on-the-go executives and are engineered to handle all the drops and bumps of daily business life.

Panasonic F8 Toughbook Laptop

When you're on the road, you need tools that are dependable and can handle the elements with ease. That's why you need a Toughbook® F8 laptop, the lightest 14.1" widescreen 3G-ready PC available with a DVD drive, complete with the Toughbook durability that you've come to expect. It's portable, thanks to an integrated handle, and has optional Gobi™ Global Mobile Internet so you can connect using 3G wirelessly almost anywhere. Add to that increased security and remote management with Intel® Centrino® 2 with vPro™ technology. And, with its magnesium alloy case, you can rest assured that no matter where you go, your Toughbook F8 will be strong enough to survive, and thrive, so you can keep working.

- Widescreen 14.1" LCD with DVD Super MULTI-drive
- 3.7 lbs. Lightweight Design
- Magnesium Alloy Case with Handle
- Intel® Centrino® 2 with vPro™ Technology
- Drop- and Spill-resistant
- Circular Scrolling
- 3G Mobile Broadband-ready Design
- Genuine Windows Vista™ Business (with XP downgrade option)
- Intel® Wireless WiFi Link 5100 802.11a/b/g/draft-n
- Shock-mounted removable hard drive
